WE CELEBRATE 50 YEARS!

We celebrate a noted milestone this year: the NAD group half century history. For this reason, we appreciate your trust over these 50 years full of outstanding goals, which summarise continuous growth because of daily efforts.

NAD started in 1973 in a small garage in Mollet del Vallès (Barcelona) where Jaume Xicola Gascón starts to manufacture motorcycle seats for local brands such as DERBI, MOTORHISPANIA, MOTO VESPA, MONTESA, SANGLAS, etc. Collaborations with Spanish subsidiaries for global brands like HONDA, YAMAHA, and SUZUKI started in the eighties.

During the nineties we began cooperating with companies on an international level. PEUGEOT, MBK, and BMW were our first clients outside our borders.

NAD embarked on a new adventure in 1992: create its own brand to sell on the aftermarket under the trade name SHAD, which started out producing motorcycle and bicycle accessories.

A new challenge for NAD at the end of 1994 was the development and manufacturing of OEM cases for one of the industry's more premium brands. We started the project alongside BMW and produced our first OEM case for their iconic R1200C model.

It was decided from that moment onwards the company would fall on trade expansion on an international scale. A feat that has taken 50 years since inception to become a worldwide leader for manufacturing seats, cases, and other motorcycle accessories.

70% of our billing is produced at NAD's Barcelona facilities. This is important for process control and our own technological development. The remaining production is manufactured in countries that have one of our subsidiaries: 25% in China and 5% in Indonesia, which has allowed us to be present in over 80 countries worldwide. We reached record numbers last year as we produced over 850,000 OEM seats mainly for the European, North American, and Asian markets. NAD is currently lead by the next generation with Jaume Xicola Serrano at the head and we now face the new challenges this globalised world offers in which personal mobility will change overall.

Thank you,

RECOGNITIONS

Design and innovation have been key to arrive where we are now and have been part of NAD's core values from the beginning, the distinctive feature that makes us leaders. The development of solutions is run by a highly qualified design and engineering team. Filing our own patents and international design awards prove their importance by certifying our focus on Research, Development, and Innovation.

We keep learning and improving daily, growing to create products that provide value to our users and clients, and emphasising RDI integration during our manufacturing processes. This is why we are a reference point for product development since we give unique solutions that work on every level and are thought for current and future mobility.

DESIGN AND TECHNOLOGY

We rely on a great team of employees and providers who have contributed with the much-needed strength to arrive where we are today and help us grow year after year. Projects for large brands have been carried out giving groundbreaking solutions. All expandable products within the motorcycle industry are produced in our facilities (BMW and SHAD). We also manufacture high-end seats with integrated electronics and technology that seek comfort and durability. The aforementioned develops our product line with a style renowned for design and innovation.

SHAD TODAY

Our project today is steadier and more competitive after 50 years of growth. Over 350 employees work at a factory and offices of nearly 30,000sqm covering over 80 countries in 5 continents and SHAD's subsidiaries are found in China and Indonesia. We currently distribute on an internal network to Spain, France, Italy, Indonesia, and China too. Our entire design and engineering team is located in Barcelona but we also have production plants in Barcelona, Jakarta, and Shanghai. SHAD exceeded for the first time during 2022 the number of 900,000 sold products which shows the brand's potential.

FUTURE CHALLENGES

The future always carries uncertainties; however we will be more prepared and able to face them. The global production model is wavering, costs, and raw materials are as variable as ever, and mobility is going through an important transformation, meaning noteworthy improvements must be suggested also in regards to environmental sustainability. This is the stage in which we live in and in which we must focus our efforts and strategies. After 50 years, we are strong and ready. We aim to emerge stronger and more competitive than ever.
